Administrative

CSci551: Computer Networks
SP2006 Thursday Section
John Heidemann

Project A

- complete specification for all phases was posted Mar. 5
- due March 21
  - deadline extended to 11:59pm (from noon) due to class server outage

Project A and Plagiarism

- sometimes when projects get due, people take "shortcuts"
- I *do* look for copied code
- **results of plagiarism will be an F for the course**
- however, if you copied code and talk to me about it before next class, I will consider alternatives

Project B

- will be posted by Monday
- will build on project A
  - you should use your Proj A code if you can
  - if not, we will provide the TA's implementation of Proj A
    - it will be commented, but it is up to *you* to figure out the details of what must change

Homework 3

- will be posted today
- due April 12

Midterm

- to get yours back, see me after class or in office hours
- answers will be posted to the wiki site
  - in marked up versions
    - solid line: correct, full credit
    - wavey line: partially correct and partial credit
    - X: incorrect
- scores
  - mean: 43 (out of 87)
  - standard deviation: 12.5
- if you scored below 33, you need to think about what you're getting out of class

Syllabus Change

- the paper [Li04a] is moved from primary to supplementary
